

Pro Packing Tips

If it fits in a box it goes in a box.

Things like lamp shades, curtain rods, baskets, and other assorted items that fit in a box/tote should go in one.

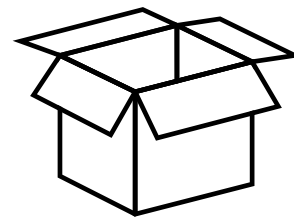

Disassembly

If you're comfortable disassembling the beds, or removing the mirrors from dressers it will cut back on the labor time of your move

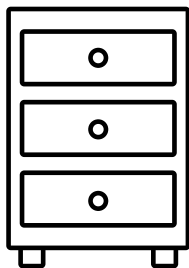

Keep a clear path for your movers so that they may serve you in the most efficient manner. Pictures & wall art may remain on the wall until your movers arrive so that they are not creating an obstacle

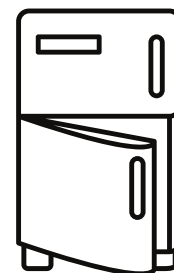

Boxes

All boxes should be filled to the top & sealed to prevent crushing.

Clothes and linens can remain in dresser drawers not made of particle board. Empty miscellaneous drawers so nothing falls out creating a hazard or getting lost.

Remove the glass shelves from fridges/freezers. Make sure to DEFROST. Fridges cannot be moved with perishable items inside. Belongings going into storage must be clear of food items.
